Guide Electromagnetic Induction

The finding that electric current can produce magnetic fields led to the idea that magnetic fields could produce electric currents. The production of emfs and currents by the changing magnetic field through a conducting loop is called induction . Electromagnetic

Induction - CliffsNotes Study

Guides Electromagnetic induction

cont. •Relativemotion is needed:

Voltage is induced either - if magnet is moved near stationary conductor, or - if conductor is moved near stationary magnet

•The voltage induced creates a current that in turn, has a magnetic field - this repelsthe original magnet that induced the
