## Years of Industrial Design Function

... Industrial design is a process of design applied to products that are to be manufactured through techniques of mass production. A key characteristic is that design precedes manufacture: the creative act of determining and defining a product's form and features takes place in advance of the physical act of making a product, which consists purely of repeated, often automated, replication. Industrial design - Wikipedia Industrial design, the design of mass-produced consumer products. Industrial designers, often trained as architects or other visual arts professionals, are usually part of a larger creative team. Their primary responsibility is to help produce manufactured items that not only

work well but please the eye and, therefore, have a competitive advantage over similar products. Industrial design | Britannica Industrial Design (ID) is the professional practice of designing products, devices, objects, and services used by millions of people around the world every day. Industrial designers typically focus on the physical appearance, functionality and manufacturability of a product, though they are often involved in far more during a development cycle. What Is Industrial Design? | Industrial Designers Society ... Industrial interior design is pleasingly flexible. Consisting mostly of neutral hues and materials that focus on unique textures, this design style is easy to
