Problems from Chapter 13 .

Question 1 Explain your answer.

Question 2 . A steel beam is suspended completely under water by a cable that is attached to one end of the beam, so it hangs vertically. Another identical beam is also suspended completely under water, Physics 11 Chapter 13: Fluids - cabrillo.edu This is College Physics Answers with Shaun Dychko. The original gauge pressure in these tires is 2.5×10^5 Newtons per square meter. Now, the ideal gas law formula requires your pressure to be absolute pressure. So we have to add atmospheric pressure to that to get 3.513×10^5 Newtons

per square meter. OpenStax College Physics Solution, Chapter 13, Problem 22 ... Essential Physics, Answers to selected Chapter 13 Problems Page 4 41. (a) The final temperature should be quite a bit lower than 60°C . The masses of the lead and water are the same, so the final temperature would be halfway between 100°C and 20°C only if the specific heats of water and lead were the same. Answers to selected problems from Essential Physics ... Compare Equation 13.8 and Equation 13.11 to see that they differ only in that the circular radius, r , is replaced by the semi-major axis, a . Therefore, the mean radius is one-half the sum of the aphelion and perihelion, the same as the semi-major axis. Answer Key Chapter 13 - University Physics
