Resources Chapter 2.pdf - Chapter 2 Chapter 2 2.1 Descriptive ... 2.5 1.

What is the minimum number of values you would need to change the median? One! The score that is the median or closest to it. For example, if the scores were 1, 3, 5, the median would be 3.0. If we change the 3 to a 4, then the median would be 4.0. Changing either the 1 or the 5 would not change the median (e.g., 2, 3, 100).

2. Chapter 2: Descriptive Statistics | Online Resources Chapter 2

Descriptive Statistics As described in Chapter 1 "Introduction", statistics naturally divides into two branches, descriptive statistics and inferential statistics. Our main interest is in inferential statistics, as

shown in Figure 1.1 "The Grand Picture of Statistics" in Chapter 1 "Introduction". Chapter 2 Descriptive Statistics - Mathematics Chapter 2 Descriptive Statistics. As described in Chapter 1 "Introduction", statistics naturally divides into two branches, descriptive statistics and inferential statistics. Our main interest is in inferential statistics, as shown in Figure 1.1 "The Grand Picture of Statistics" in Chapter 1 "Introduction". Nevertheless, the starting point for dealing with a collection of data is to organize ... Chapter 2 Descriptive Statistics - GitHub Pages 2.2.3 Variation. We often want to know how variable the numbers are. We are going to look at descriptive statistics to describe this such as the range,

variance, the standard deviation, and a few others.. First, let's remind ourselves what variation looks like (it's when the numbers are different). Chapter 2 Lab 2:

Remember to look at your data.

Descriptive statistics are great and

we will use them a lot in the course

to describe data. You may suspect

that descriptive statistics also have

some short-comings. This is very

true. They are compressed

summaries of large piles of

numbers. They will almost always

be unable to represent all of the

numbers fairly. Chapter 2
