Close Up And Macro Photography Close-Up and Macro Photography is a brilliant resource but only really offers a little for those who have been taking photos for a while. I'm a completely self-taught amateur photographer and I, personally, only found helpful info in the chapters on lighting and camera supports (hence my rating of only 3 stars). Close-Up and Macro Photography (The Focus On Series ... Amazon.com: Close-Up and Macro Photography: Art and Techniques (9781847975973): Humphrey, John: Books Amazon.com: Close-Up and Macro Photography: Art and ... When it comes to exploring macro and close-

up photography, the good news is that anyone can participate. While a DSLR camera is preferred for close-up work, using a compact camera can be just as rewarding. Close-Up and Macro Photography Tips - PictureCorrect Macro photography is in essence close up photography as well. However, close up photography is not always considered as true macro photography. For example, if you have a lens that is NOT considered a real macro lens, yet offers a macro setting (as many do nowadays), this is usually referred to as being close up photography, and not true macro. Difference Between Macro Micro and Close Up Photography ... There is an entire universe of beauty, fascination and intrigue on a scale not readily captured

in conventional photography. This video shows you how to get ... Close-Up and Macro Photography | Lester Lefkowitz - YouTube Close-up means you're just shooting at a short distance from the subject. You can use virtually any lens to achieve close-up photos. Macro means you're taking super close-ups of objects at 1:1. Meaning, the size of the image on your sensor is equal to the size of the item you're photographing in real life. Close-Up Photography vs Macro vs Micro (What's the Difference) Close-Up and Macro Photography | Lester Lefkowitz. In this B&H Event Space video, photographer Lester Lefkowitz shows you how to get in close, closer and really close, to capture the wonderful details and never-ending curiosities of

both natural and man-made objects. Close-Up and Macro Photography | Lester Lefkowitz | B&H ... With close-up, you can shoot it with most lenses, you get very close to your subject with a zoom or by walking closer but can still tell what it is without question and you can do it successfully with a moving subject. The two images above, shot in Costa Rica in 2012, were taken with the 100 mm Canon macro lens. MACRO VS. CLOSE-UP PHOTOGRAPHY To be safe, stick to two to three filters if you need to stack the close-up filters. That way, you can retain most of the quality for your macro photography. Composing with Macro Filters. The rules of composition in photography apply to all sorts of genres, including macro photography. But if you're

used to taking photos of people, you may find it challenging to figure out your subject when doing close-up shots of objects. A Guide to Using Macro Filters for Close-Up Photography The camera lens you use is the real defining difference between close up and macro photography. Anyone can take a close-up picture, such as with a telephoto lens. But generally, macro photography can only be created with a macro lens. These pricy lenses allow you to capture the detail of an insect's head, or the texture of a flower petal. Knowing the Difference Between Macro, Micro, and Close-Up ... The Young Close-up Photographer of the Year attracted some strong entries with Tamás Koncz-Bisztricz winning the overall title for a shot of a

springtail in a meadow close to his home in Hungary. 'One frosty winter's morning I headed out to take some extreme macro shots at the surface of some frozen water that had pooled in the tracks left ... Close-up Photography of the Year winners revealed ... Most people associate close-up and macro photography with spring and shooting outdoors, capturing subjects such as small insects, flowers, and other plants in the outdoors; however, macro... Getting closer: close-up and macro photography | The Star The basic set-up required for close-up photography apart from the obvious camera body is a lens with macro capabilities. These macro-capable lenses can come in the form of a (short/long) tele-photo lens with a close-up "filter", a

standard zoom lens with macro mode settings or a specialized Micro Nikkor macro lens. Beginner's Guide to Close-up & Macro Photography Macro photography, also known as close up photography, is the art of making small things look big, or macro. In technical terms, macro images reproduce the subject at a magnification ratio of at least 1:1, where the image in the camera sensor is the same size or bigger than the real-life thing. The Beginners Guide to Macro Photography Close-up photos of flowers can make for interesting colours and shapes. There is something magical about seeing a subject up close and personal. This opens up a whole new world of options for you as a photographer. Close-up photography, or macro

photography, can be a very rewarding form of photographic expression.
