Cpr Guidelines American Red Cross Red Cross CPR Steps. 1. Push hard, push fast. Place your hands, one on top of the other, in the middle of the chest. Use your body weight to help you administer compressions that are at least 2 inches deep and delivered at a rate of at least 100 compressions per minute. 2. CPR Steps | Perform CPR | Red Cross - American Red Cross By following the guidelines set forth by the American Red Cross you can help save someone's life should they suffer a cardiac arrest. Remember "Check, Call, Care". Check the scene and the victim. Call for Emergency Medical Services. Check for breathing. Check for severe

bleeding. Care for the victim 2019-2020 CPR Guidelines American Red Cross (Review) Based on studies of other disease transmission, it is reasonable to conclude that chest compressions and cardiopulmonary resuscitation (CPR) have the potential to generate aerosols. While there would be a risk of disease transmission when performing CPR on a person with COVID-19, compression-only CPR may be associated with a decreased risk of transmitting the virus compared to CPR with rescue breathing. Transmission-Based Precaution Guidelines - American Red Cross Note: It is recognized that in some of the cases, the victim may also have COVID-19. However, if a lay responder is unable or unwilling to provide rescue breathing with

CPR, compression-only CPR should be initiated. Guidance for Compressions. Chest compressions and use if an AED is available is recommended for every cardiac arrest victim.
