Dynamical Contact Problems With Friction Models Methods ... The aim of this work is to study a dynamic problem that constitutes a unified approach to describe some rate-dependent interactions between the boundaries of two viscoelastic bodies, including relaxed unilateral contact, pointwise friction or adhesion conditions. The classical formulation of the problem is presented and two variational formulations are given as three and four-field evolution ... A dynamic viscoelastic problem with friction and rate ... compliance and damage <p style='text-indent:20px;'>We formulate a dynamic problem which governs the displacement of a viscoelastic body which, on one hand, can come into frictional contact with a penetrable foundation, and, on the other hand, may undergo material damage. On dynamic contact problem with generalized Coulomb ... We consider a contact process between a body and a foundation. The body is assumed to be viscoelastic and piezoelectric and the contact is dynamic. Unlike many related papers, the body is assumed to be non-clamped. The contact conditions has a form of inclusions involving the Clarke subdifferential of locally Lipschitz functionals and they have nonmonotone character. Numerical
