The events of the late 1970s in the wake of California's Proposition 13 brought this question very sharply into popular focus.

From best-selling author Kelly Rainer, and coauthors, *Environmental Psychology: An Interdisciplinary Perspective* ... Environmental psychology is an interdisciplinary field that focuses on the interplay between individuals and their surroundings. It examines the way in which the natural environment and our built environments shape us as individuals. The field defines the term environment broadly, encompassing natural environments, social settings, built environments, learning environments, and informational environments. Environmental psychology was not fully recognized as its own field until the late 1960s when Environmental psychology - Wikipedia Environmental psychology is a field of

psychology that focuses on the study of how humans are affected by their environments, or surroundings. They study human reactions to environments in order to gain some insight on how the environments can be changed to manipulate people's feelings, thoughts, and possibly actions in them.
