increase population size include births and immigration, which is the movement of individuals into an area. Factors that decrease population size include deaths and emigration, which is the movement of individuals out of an area.

reading guide3 (1) - Name  
Class Date 5.1 How Populations ... Section 5-1: How Populations Grow - Logistic Growth Populations mostly grow logistically because of factors that limit their growth. Usually resources will become scarce. When the death rate has become equal to the birth rate the growth of the population will stop.

Chapter 5-6 Study Book Population growth is the increase in population size over time. Students learn that population growth, while exponential at times,

is controlled by limiting factors that determine the carrying capacity of the environment. Such limits to population growth may result from predator-prey interactions or overcrowding.
