LEGO-based therapy for kids living with autism - YouTube

Bricks for Autism is a social venture that aims at supporting children with communication and learning disabilities through a therapy of building LEGO models. And whilst helping children with autism develop key skills, it also helps funding vital research. In this form of therapy, children work together and are assigned roles – the engineer who has the instructions, the supplier who has the bricks, and the builder who puts the model together.

LEGO®-Based Therapy and children with Autism

Lego Therapy falls within the ‘play based’ therapy methods for children. These methods apply the therapeutic benefits of play and build on the natural way that children learn about themselves and their relationships in the world around them. Through play-based therapy, children learn to communicate with others and express their feelings

Bricks for Autism: LEGO-based therapy for children

Lego®-Based Therapy was developed by Dr Dan LeGoff in Honolulu around 15 years ago, after he observed how two children in his Autistic Spectrum Condition (ASC) clinic began spontaneously interacting whilst playing with Lego®. It seemed that the structured play and shared goal were supportive for these children to

interact socially.
