Coaxial cables are part of Allied Wire & Cable's extensive collection of Mil-Spec Wire and Cable. All M17 cables are designed and constructed according to the military's M17 specifications for coaxial cables. Each MIL-C-17 cable is designed to maximize both reliability and longevity in difficult situations that those in the military might encounter. M17 Coaxial Cable | Allied Wire & Cable MIL-C-17 is a government regulatory document that standardizes coaxial cables. The standard has been used since the 1940s. To better define the mechanical and electrical requirements of military coaxial cables, revision E of MIL-C-17 was released in 1976. The MIL C 17 specification defines the complete

Products & Suppliers ... MIL-C-17 is the government specification document used to standardize coaxial cables; it has been in use since the 1940's. In the many revisions made to MIL-C-17 over the years, the familiar RG part numbers were superseded by M17 part numbers during the 1970s. MIL-C-17 (m17) Coaxial Cable And RG Coaxial Cable There are variations of the common coaxial lines and new ones were added. Thus, the cables were reorganised and relisted by MIL-type. For better recognition, the old RG-description is attached, e.g. M17/75-RG214.
