For example, Call Center performs Delete, Get, Insert, Update, or Upsert operations on rows in data objects migrated from BAM 11g within a BAM 12c server. Using Oracle BAM Web Services When a connection to the external data object is configured in Oracle WebLogic Server, Oracle BAM can access it. The external data object name may be changed from the actual table name, but the column names are unchanged. Some columns may not be selected for visibility in BAM. Working with Data Objects - Oracle Oracle BAM supports drilling to details which allows the end user to see the lowest level of detail for the data which was used to calculate a particular element of the chart. The dashboard designer can choose which fields and in what order the user will see when they drill through to the low-level details.
