Practical Grounding Earthing Shielding Emc 4 Practical Shielding, EMC/EMI, Noise Reduction, Earthing and Circuit Board Layout The most common causes of continuous interference are: • 50/60 Hz Supply Power • Electric Motor (Especially Commutator Type) • High Power Radio Signals • Switch Mode Power Supplies • Microwave Ovens • Ignition Circuits Practical Grounding/Earthing, Shielding, EMC/EMI and ... But the EMC functions are different; the word Grounding will be used to distinguish the EMC function while Earthing will be used for the safety function. The recognized and accepted purpose for grounding is to give a reference for external connections to the system. Practical Shielding, EMC/EMI, Noise Reduction, Earthing ... Practical Shielding, EMC/EMI, Noise Reduction, Earthing & Circuit Board Layout of Electronic Systems (1.2 CEUs) Note: Please do not book travel and accommodation until you receive course confirmation. Breakfast, two refreshment breaks and lunch are provided daily. The aim of this workshop is to help you identify, design, prevent and fix common EMI/EMC problems with a focus on earthing and shielding techniques. Practical Shielding, EMC/EMI, Noise Reduction, Earthing ... a) Earthing is the process of connecting dead part of the wire, i.e., the part which does not carry, to the ground. On the other hand, grounding is the process of connecting current carrying part to the ground. b) Basic EMC function of a ground system is to protect the electrical equipments from damage. Shielding Shielded enclosures generally surround a product's circuitry on all sides. Care is taken to ensure that all apertures are small and every seam is sealed. On the other hand, it is not uncommon to find shields that don't surround the entire product.
