Trams And Buses And The The GLT "trams" are legally considered buses as they have steering wheels and can leave the fixed rail when requirements dictate e.g. when journeying to a depot while a Translohr "tram" cannot operate without a guidance rail and are generally not considered buses. Types of trams - Wikipedia Stand on a bus, and you risk getting thrown all over the place as every time it brakes sharply. But trams tend to brake and accelerate more gently, so you're relatively comfortable, even if you're standing the whole way. Oh, and you can extend trams by adding extra cars during rush hour, without clogging

the road or hiring more drivers. So are trams really better than buses? | CityMetric A trolleybus is an electric bus that draws power from dual overhead wires using spring-loaded trolley poles. Two wires, and two trolley poles, are required to complete the electrical circuit. This differs from a tram or streetcar, which normally uses the track as the return path, needing only one wire and one pole. They are also distinct from other kinds of electric buses, which usually rely on batteries. Power is most commonly supplied as 600-volt direct current, but there are exceptions.
